Interdependencies Breakout Question #1

- What are our key interdependency concerns relating to wildfires and drought?
- In general, change will require that we consider existing inequities:
 - **Drought:** Dam capacity, energy generation, firefighting
 - **Wildfires:** Debris management, air quality, homeowner displacement
 - **Economic impacts**

Interdependencies Breakout Question #2

- Does each sector impacted by wildfires and drought account for interdependencies in the planning phase?
- Uneven!
 - California seems to be the leader in planning

Interdependencies Breakout Question #3

- Can the standing committees work together to address the interdependencies challenges posed by wildfires and drought?
 - Reconfigure water system
 - Socio-economic group needs to work with every other group to address the equity issue
