

## Report Out Slides

### Social and Economic Standing Committee

Sponsored by:

**NIST**  
National Institute of  
Standards and Technology  
U.S. Department of Commerce

- Begin developing a project plan:
  - Develop a short list of 3-5 potential products/documents to include in project plan:
    - List of what communities are required to do
    - Inventory of resilience programs

- Develop plan as to how standing committee will develop work products selected:
  - For each envisioned product, will it be developed at the standing committee level or will work groups be formed to address the issue?
    - Community Requirements:
      - ❑ Draft list
      - ❑ Expand
      - ❑ Share with full committee
    - Resilience Program Inventory (open source and on-line):
      - ❑ Basic list
      - ❑ Contact selected programs:
        - » Criteria
        - » Script

- Begin developing a project plan.
  - Develop a short list of 3-5 potential products/documents to include in project plan:
    - Project to quantify risk to encourage communities to take resilience action
    - Develop a way to assign an economic value to non-market benefits and costs to include them in the decision making process
    - A short paper on how the discount rate works and relates to resilience project lifecycles
    - Make a business case that includes business:
      - Need for business continuity planning
      - Involving business in community resilience planning
    - Easily understandable guide to funding sources (e.g., FEMA grant process, philanthropy, finding funds from within community, etc.)
  - Begin formulating how to split products into sub-categories and set their priorities, if necessary:
    - To be determined

# S&E Whole Community Work Group

## Meeting Objective #1

- Begin developing a project plan:
  - Develop a short list of 3-5 potential products/documents to include in project plan:
    - Implementation guide (scalable and adaptable)
    - Roles and responsibilities “matrix” (define audiences/upper and lower boundaries of what defines community):
      - Leadership/Decision Makers
      - “Implementers”
      - Review/Support Network (feedback, auditing)
      - End-user (the community, however it is defined)
    - Key messages/products geared towards the target audience (need to use multi-channels based on how people like to receive information, outcomes)
    - Series of simple illustrations to explain resilience concepts/community systems and seek stakeholder input
    - Graphic depiction of community and intersection of roles/responsibilities (e.g., Venn diagram)
