Transportation Standing Committee

Sponsored by:

NIST
National Institute of
Standards and Technology
U.S. Department of Commerce

Standing Committee Meeting Objective #1

- Review resilience plans that include transportation infrastructure:
 - Definition – What should be considered in the definition of the “transportation system?”
 - Synthesis – What are commonalities, differences, geographical scales, hazards (scale and magnitude), recovery (resources/adaptation) in approaches to resilience planning in existing plans/frameworks?
 - Gap-Analysis – What are current plans/frameworks not addressing that should be a focus of this committee?
- Coordinating investment strategies:
 - Benefit-Cost
 - Governance Structure
 - Public Outreach (both political, and general public)

Standing Committee Meeting Objective #2

- Develop plan as to how standing committee will develop work products selected:
 1. Identify frameworks/plans/resources relevant to the synthesis effort:
 - Coordinate with TRB resilience initiatives
 2. Collect these resources in CRPanel website committee file share
 3. Develop rubric/standard for the evaluation, synthesis, gap analysis of these resources

Standing Committee Meeting Objective #3

- Begin outlining the standing committees' project plan and proposed products.
 1. Develop matrix of resilience planning resources and the dimensions specific to each:
 - Performance-based action and plans
