In Minneapolis...

- The DMT Committee heard a summary of community survey results from Jesse Keenan
 - Recommendation: We would like access to the raw data to perform data analysis and understand community needs
- We joined the RKB Working Group Meeting led by Bob Ashcraft
 - Recommendation: Hold future RKB working group meetings with full Panel to ensure we are aligned on approach and implementation
- We held a cross collaboration meeting with Water & Wastewater
 - Agreed to pass resources that align to one another
 - DMT offered to review W&W paper once complete
- We reviewed DMT resources for RKB consideration
 - Recommendation: Identify audience of resources as collaborative planning team and indicate level of technical difficulty.

PROGRESS in Minneapolis

- Thank you to our new members!
 - Howard Park
 - Joel Thomas
 - Shannon Burke
 - Alexa Squinni
 - Lesley Edgemon
- We voted for a new DMT Secretary - Congratulations to **Lesley Edgemon**
- We voted to move for EPA's EnviroAltas to the CRPCC for vote to the RKB
- We confirmed our goals and alignment to Panel Decision Support Resources goal
- CRPCC voted yes to including the DMT Recommendations Paper on the CRPanel webpage

Accomplishments to Date – The Spirit

Over the past two years, the Data, Metrics, and Tools (DMT) Standing Committee has focused time and effort to find an identity, scope, goals, and effective modus operandi. This effort included discussions, brainstorming, and experiments along different paths, some of which did not work out, but taught us lessons. We formalized our work and experience in the "DMT Roles and Responsibilities" document.

In summary, **the objective of the next 12 months is to complete the transition to a steady state**, at which point the committee will just follow said document and continue its operations performing the tasks described and following the associated processes.

Goals for 2018 – Immediate Tasks

- 
 Publish the Recommendation Paper: Including portfolio management practices into the NIST Community Resilience Planning Guide and Resilience Knowledge Base (RKB) on the Panel website (attached)
- 
 Revisit prior DMT Committee reviews of the following documents:
 - Framework for Measuring Community Resilience
 - Insights on Training Community Coalitions in LA County
 - EPA EnviroAtlas
- 
 Vote to move these materials forward (or not) to CPRCC for their consideration in the RKB
- 
 Review results from the end-user survey administered by Panel
 - Revisit work of DMT Working Group A and Working Group B to determine next steps.
 - Transition to SharePoint
 - **Find a new chair!**

Goals for 2018 – The Tasks (long-term)

- Determine which of the 50 documents posted on the DMT collaboration space to review, following the reviewer role and process as identified in the DMT Committee Roles and Responsibilities document
- Apply the revised taxonomy to those documents selected for review by the Committee. Vote for moving forward to the CRPCC for inclusion (or not) into the RKB
- Continue to have DMT Committee members join other Committee meetings and the RKB working group for cross-coordination
- Continue to follow our DMT Committee Roles and Responsibilities document, reviewing draft materials as entities and individuals provide materials for review and comment
- Continue engagement with Federal CRPCC members
- Continue communications and collaboration with NIST fellows
- Learn more about activities and work of the NIST COE
- Incorporate feedback from community users
